ES/PCI™ – All the Great Features of the 3XTwin on a PnP PCI Card

ES/PCI – powerful, flexible, plug and play, seven-session, Twinax PCI card for Windows 95, 98, NT, ME, 2000 and XP.

- Builds on NLynx’s proven Twinax technology
- Can be installed in any PC with a PCI bus
- Plug and play
- Easy configuration
- Full Featured 5250 Emulation
- Supports Windows 95, 98, NT, ME, 2000 and XP.
- Includes drivers for the support of IBM’s Client Access.

ES/PCI provides 5250 display and printer emulation and convenient twinax access to your iSeries AS/400, Advanced 36 and System 36.

If you are integrating new faster and more powerful PCI-based PCs into your environment, ES/PCI is your most cost-effective, high-performance connectivity solution!

1-512-301-8000 x8077
ES/PCI is a hardware/software package that provides powerful, flexible local 5250 terminal and printer emulation for any 32-bit Windows® environment. Using a PCI slot, you can link PCs via twinax or UTP to an IBM System/36®, Advanced Series/36®, or AS/400®, to emulate a variety of 5250 terminal types and IBM midrange printers.

Based on PCI bus technology, ES/PCI can be easily installed in the latest and fastest PCs, using true plug-and-play technology.

- **Plug n Play.** ES/PCI card supports PnP configuration to automatically select the appropriate IRQ and IO address, eliminating configuration headaches.

- **Multiple session support.** A single PC can run seven sessions concurrently. S/3X data entry, batch processing, print jobs, and PC resident software can be run simultaneously.

- **Printer options.** Choose from a variety of popular printers supported by the PC. Up to three printers are supported at any one time, each running independently while another host or PC application is active.

- **Hotspots identify host menu items.** Host menu items and function keys can be assigned colors. Employ this aesthetic and intuitive approach to locate them quickly and easily.

- **Keystroke memory and playback (macros).** Predefine keystrokes for automated sign-on, repetitive data entry, or unattended operation. Store as many as 2,048 keystrokes in up to 24 keyboard macros.

- **ETU® file transfer support.** ETU, an industry standard from Decision Data/NLynx, allows direct file transfer between the PC and System/36, Advanced Series/36, or AS/400.

**Additional Features**

- Drop-down menu support using mouse button.
- Keyboard mapping allows easy reconfiguration to support existing keyboards.
- Advanced printer support includes Autorotate, Autosize and Host Transform functions. Direct-connect or network-attached printers.
- Custom tool bar allows users to create their own easy-to-use buttons for frequently used items, including macros.

**PC System Requirements**

- PCs with 486, Pentium® or higher processor
- CD ROM drive
- Hard disk with 6MB space available
- PCI expansion slot
- Minimum of 8MB of memory
- Windows 95, 98, NT (4 or above), ME, 2000 or XP

**IBM Devices Support**

- Host Displays (80 or 132 column, mono or color): 5251–11; 5291–1,2; 5292–1; 3179–2; 3180–2; 3196–all; 3197–C,D
- System Printers: 3812, 5219, 4214, 4210, 5225, 5224 or 5256

**The ES/PCI Package:**

- ES/PCI Twinax Adapter Card
- 32-bit emulation software (CD ROM)
- Twinax T-Connector
- Quick Installation & User Guide (on CD)

**Part Number:**

ES/PCI 301-9606-01

**Warranty:**

One-year limited warranty. Extended warranty available.
