

The **LT<sup>®</sup>1137A** product now has improved protection against ESD pulses. The RS232 Driver and Receiver pins are fully compliant to the IEC-801-2 test standard. This standard defines two alternative test methodologies, air gap and contact modes. The LT1137A meets both the  $\pm 15\text{kV}$  air gap mode and the  $\pm 8\text{kV}$  contact mode test methods of IEC-801-2.

For complete specifications, pin-out, typical performance curves and applications information, please see the **LT1130A** family data sheet.
