

File Download: docs_tutorials

Contents of /ftp/doc/tut

Note Abeltut.zip, cpldtut.zip, fndtut.zip, and xacttut.zip are all stand-alone tutorials for their particular product and contain the interface files necessary for the tutorial to work. If you do not wish to download an entire set of tutorials and just want a tutorial on a specific product feature (for instance : floorplanner), you may download masttut.zip, which contains only the interface files but no tutorial modules and then download the corresponding tutorial module(s) from the tutorials_module directory. If you have installed any of the interfaces below, you will have the interface files to use any of the module files. Please look in the tutorials_modules directory 00_index file for a complete listing of tutorial module files. Please read the enclosed readme.txt file for installation instructions.

Filename	Size	File Description
abeltut.zip	1,673KB	Windows 3.1.x/95 based tutorials on using the XABEL-CPLD software. (for XC7000 and XC9000 families)
