

Software Product Description

PRODUCT NAME: INSTRUMENT Bus Subroutines, Version 2.1

SPD 12.14.3

DESCRIPTION:

INSTRUMENT Bus Subroutines (IBS) allows the user to control the IEEE Bus through commands that control data transfer via the IB11 or IBV11-A. It also allows the user to specify a FORTRAN completion routine that will be entered asynchronously when any device on the IEEE bus asserts the Service Request Bus Line. This software supports the IB11 or IBV11 as controller-in-charge of all bus activity.

IBS consists of:

- Library of FORTRAN callable subroutines to support the IB11 and IBV11-A interface from an IEEE-488-1978 General-Purpose Instrument Bus
- Special device handler called by routines in the library

IBS runs under the RT-11 Operating System.

MINIMUM HARDWARE REQUIRED:

Any valid RT-11 system configuration with at least 32K bytes of memory, and one of the following:

IBV11-A IEEE bus for Q-BUS
IB11 IEEE bus for UNIBUS

OPTIONAL HARDWARE:

Up to a system total of eight IB11 or IBV11-A boards

Each interface operates as the system controller-in-charge; thus, there can be only one IBV11-A per IEEE bus.

NOTE: The software can communicate through only one unit at a time, although SRQ processing can be active on all units simultaneously.

PREREQUISITE SOFTWARE:

RT-11 Operating System, Version 4.0 with FORTRAN IV/RT-11, Version 2.5

OPTIONAL SOFTWARE:

None

TRAINING CREDITS:

None

SUPPORT CATEGORY:

CUSTOMER SUPPORTED

INSTRUMENT Bus Subroutines is provided on an "as is" basis without warranty expressed or implied. Any software services, if available, will be provided at the prevailing rate.

ORDERING INFORMATION:

All binary licensed software, including any subsequent updates, is furnished under the licensing provisions of DIGITAL's Standard Terms and Conditions of Sale, which provide in part that the software and any part thereof may be used on only the single CPU on which the software is first installed, and may be copied, in whole or in part (with the proper inclusion of the DIGITAL copyright notice and any DIGITAL proprietary notices on the software) only for use on such CPU.

All source licensed software is furnished only under the terms and conditions of a separate Software Program Sources License Agreement between Purchaser and DIGITAL.

A single-use, license-only option is a license to copy the software previously obtained under license.

The following key (E, H, Q, Y, Z) represents the distribution media for the product and must be specified at the end of the order number, e.g., QJ015-CE = binaries on RK05 Disk Cartridge.

E = RK05 Disk Cartridge
H = RL02 Disk Cartridge
Q = RL01 Disk Cartridge
Y = RX01 Floppy Diskette
Z = No hardware dependency

QJ015 -C— Single-use license, binaries, documentation, no support services (media: E, H, Q, Y)

QJ015 -D— Single-use license-only option, no binaries, no documentation, no support services (media: Z)

Update/Unsupported Options

Users of INSTRUMENT Bus Subroutines may order under license the following software option as an update to an earlier version. The option may also be purchased for use on a second or subsequent CPU, in conjunction with a binary, single-use, license-only option. Options are distributed in binary form on the appropriate medium and include no installation or other services unless specifically stated.

QJ015 -H— Binaries, documentation (media: E, H, Q, Y)

QJ015 -H— Right to copy for single-use, no binaries, no documentation (media: Z)

ADDITIONAL SERVICES:

None
