- Sculptured Keytops
- Off-The-Shelf Availability
- TTL Level Serial Input/Output (300 Baud)

OPTIONAL FEATURES
- 9 Additional Keys
- Parallel Data Output
- Card-Edge or Header Connector
- Minimum Interface

DESCRIPTION:
The model offers the popular key layout for a detachable, serial interface terminal keyboard. An onboard microcomputer provides features not found on any other keyboard. The simple four-wire serial port provides four modes of key data and allows the terminal to actuate the LED indicators and an audible device which beeps or clicks as instructed. Key Tronic sales representatives are located worldwide to assist you with your unique keyboard requirements. They have pricing, delivery, and part number information on all of our standard designs, and can also work with you to specify a low-cost custom keyboard if required.
NOTE: NO AUTO REPEAT IN CONTROL OR SHIFT/CONTROL MODE.
NOTE: NO AUTO REPEAT IN CONTROL OR SHIFT/CONTROL MODE.
Note: No auto-repeat in Control or Shift/Control mode

US = UNSHIFT
SH = SHIFT
SC = SHIFT/CONTROL

NOTE: Shift & caps lock produce unshift code

Positive Logic
