This memo is to be issued simultaneously with the new LISP 1.5 Programmer's Manual. At the present time, the manual is without a general index and without any appendicies.

Appendix A is planned as a complete list of functions within the LISP system, and will be issued shortly. Other appendicies will contain detailed information about the interpreter, input-output, and system operation.

The manual is intended to apply to a version of LISP 1.5 called "LISP 1.5 Export A" which has not yet been issued. LISP 1.5 systems preceding this version differ in certain details.

Pre-export LISP 1.5

3. Traclis can only trace EFRP's.

4. Error diagnostics listed as A6 and A7 will appear as A10 and A11 in the current system.
