Preface

Manual Objectives

The *RSX-11M Version 4.2 Update Notes Revision A* provides the system manager with a description of the RSX-11M Version 4.2 Revision A update software. It includes a list of the RSX-11M layered products that can be updated by using the update software.

Intended Audience

This manual is intended for use by system managers and system users familiar with both RSX-11M and RSX-11S operating systems.

Structure of This Manual

Chapter 1 describes the contents of the RSX-11M Version 4.2 update software and includes a list of the layered products that may be updated with this software.

Associated Manuals

The following manuals may be useful:

- *RSX-11M System Generation and Installation Guide*
- *RSX-11M/RSX-11S Release Notes*

Conventions Used in This Manual

The following conventions are observed in this manual.

Convention	Meaning
.	A period; separates the file name from the file type in a file specification.
;	A semicolon; separates the file type from the file version number in a file specification.

Chapter 1

Updating Your RSX-11M Operating System

1.1 Introduction

The *RSX-11M Version 4.2 Update Notes Revision A* provides you with a list of the layered products that have been updated for RSX-11M Version 4.2. The files in this update kit enable you to make changes and corrections to each layered product, which will result in improved software performance.

The procedure for applying the update software to your RSX-11M operating system is similar to that used for previous update releases. The following list outlines the procedures for applying this update package:

1. Invoke the update command procedure (@Update).
2. Run the system generation program.
3. Apply corrections to the layered products.

Be sure to read Chapter 2 of the *RSX-11M System Generation and Installation Guide* and Chapter 1 of the *RSX-11M/RSX-11S Release Notes* for Version 4.2 before you attempt to invoke the update command procedure.

1.2 Layered Product Update File Summary

Table 1-1 lists the layered products that have been updated for Version 4.2 of RSX-11M. The respective directories and documentation files for each layered product are also included. The documentation file describes the procedure for applying the corrections to the layered product.

Table 1–1: Layered Product Update File Reference Table

Layered Product	Directories Used	Backup Set	Documentation File Name
DATATRIEVE-11 Version 3.1	[222,200]	DTR	[222,200]DTR.DOC
COBOL-81/RSX Version 2.3	[216,200]	C81	[216,200]C81.DOC
